

Product Specifications

Gear Punch Tool

Part number GPT

Category number 6411

UPC 781002857501

The Gear Punch is the first gear driven knockout tool to feature a 7/16 quick change hex that allow users to cut down on installation time and increase jobsite efficiency. Lightweight and durable, the Gear Punch Tool is capable of cutting through 10 gauge mild steel and 10 gauge stainless steel.

Physical Characteristics

Type	Gear Punch Tool
Material	S45C Steel & Aluminum Alloy
Handle Material	Aluminum Alloy

Packaging Details

Standard Qty	1
Price Per	1
Package Weight	5.9
Net Weight	5.9

Performance Data

Intended Cutting Material	Steel & Stainless Steel
Applications	
Hole-Making in Steel & Stainless Steel	
Capacity	Up to 10 ga Steel & Stainless Steel
Special Features	
Strong Base, Replaceable 7/16" Carburized Steel Quick Change Hex Adapter	

Certifications

RoHS Compliant	No
