

Tray Cable Cord Connectors

SHC1046

074011259

Do all Kellems connectors have a tray cable rating?

Please see the specification sheet for the TC callout. The most popular size connectors used with tray cable have the rating for TC tray cable.

What is the rating on Hubbell's cord connectors?

UL514B tray cable rated.

What makes up the liquid tight seal in the cord connector?

The neoprene bushing compresses inside of the tapered interior dome of the cord connector to form the liquid tight seal. When the nut is tightened it compresses the bushing to form this seal.

Are Kellems cord connectors and deluxe grips rated for all types of tray cable?

No, select Kellems cord connectors and deluxe grips are suitable for use with tray cable in dry locations.

Where is tray cable used?

Tray Cable is a multiconductor or multipair cable designed for use in cable trays, duct or raceways. You can find tray cable in manufacturing plants, chemical facilities, mining operations and data centers.

What material are these tray cable rated connectors?

Kellems cord connectors are offered in a variety of different materials to suit the environment that they are being used in. Kellems offers cord connectors in machined aluminum, machined zinc plated steel, stainless steel, nylon gray, nylon black, cast aluminum and malleable iron. Please reference our catalog for further details.

What NPT hub sizes have the tray cable rating?

Select SKUs within the 1/2", 3/4", 1", 1-1/4", 1-1/2", 2", 2-1/2", 3" NPT sizes have the TC rating.

Can I purchase replacement bushings and gotcha rings?

Kellems offers replacement bushing and gotcha rings for NPT hub sizes 1/2", 3/4" and 1".
