

HOT DIP GALVANIZED

Topaz is proud to support the rebuilding of our nations infrastructure by offering new Hot Dipped Galvanized products that meet the strict requirements for outdoor installation in a harsh environment.

Hot Dip Galvanized Products

Topaz Hot Dip Galvanized Electrical Fittings are designed to resist corrosion and provide superior protection from harsh environments.

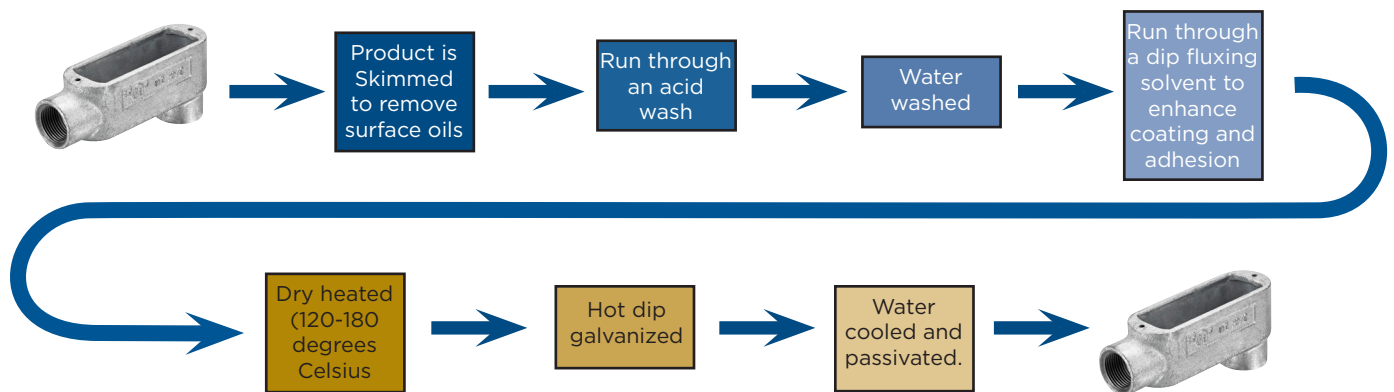

Can be used on infrastructure projects like Bridges, Tunnels, Railways and other large mass transit projects where approved.

- UL Listed E195122, E148716, E174011, E195124
- NEMA FB1
- Conforms to finish thickness ASTM A123/123M

The Hot Dip Galvanized Process

The Hot Dip Galvanized process is achieved by passing the product through a molten bath of zinc at an extreme temperature. This results in a metallurgical bond between zinc and steel with a series of distinct iron-zinc alloys. The hot zinc forms a thicker coating which prevents corrosion to the product and forms a physical barrier, which acts as a sacrificial anode should the barrier be damaged.

HOT DIP GALVANIZED

RIGID LB TYPE WITH ROLLERS

APPLICATIONS:

- Provide taps for branch conduit runs
- Make 90 degree bends in conduit runs
- Act as pull outlets for conductors being installed
- Provide openings for making splices and taps in conductors
- Provide for access to conductors for maintenance and future system changes
- Connect conduit sections

E195124

Conforms to finish thickness
ASTM A123/123M
UL514B
NEMA FB1

FEATURES:

- Built-in rollers to facilitate wire pulling.
- Hot Dip Galvanized finish provides superior protection against severe environmental factors.
- Meets project specifications for Department of Transportation & Mass Transit.
- For use on infrastructure projects including bridges, subways, railways and other means of transportation.
- For Governmental Use on Federal and State approved Projects

MATERIAL:

- Body Malleable Iron
- Rollers Steel

FINISH:

Hot Dip Galvanized

HOT DIP GALVANIZED

RIGID SET SCREW CONNECTORS

APPLICATIONS:

Used to join unthreaded rigid or IMC conduit to box or enclosure

FEATURES:

Concrete-tight when taped. Hot Dip Galvanized for added durability and corrosion protection

MATERIAL:

Malleable Iron
Galvanized Steel Screw

FINISH:

Hot Dip Galvanized

E148716

Conforms to finish thickness
ASTM A123/123M
UL
RoHS
NEMA FB1
Federal Spec. A-A-50553

Part No.	UPC	Description	Unit Ctn.	Ship Case	Weight Case	A	B

RIGID SET SCREW COUPLINGS

APPLICATIONS:

Used to join two unthreaded lengths of rigid conduit or IMC

FEATURES:

Concrete-tight when taped. Hot Dip Galvanized for added durability and corrosion protection

MATERIAL:

Malleable Iron
Galvanized Steel Screw

FINISH:

Hot Dip Galvanized

E148716

HOT DIP GALVANIZED

RIGHT ANGLE CONDUIT SUPPORT

APPLICATIONS:

Right-angle conduit clamps are used to mount EMT or rigid conduits across or perpendicular to beam, channel or angle supports

FEATURES:

Hot Dip Galvanized for added durability and corrosion protection. Provides a secure connection and tight clamping action capable of withstanding heavy loads.

MATERIAL:

Malleable Iron
Galvanized Steel Hardware

FINISH:

Hot Dip Galvanized

E174011

PARALLEL CONDUIT SUPPORT

APPLICATIONS:

Parallel conduit supports are used to mount EMT or Rigid Conduits Parallel to a beam, channel or angle supports.

FEATURES:

Hot Dip Galvanized for added durability and corrosion protection. Provides a secure connection and tight clamping action capable of withstanding heavy loads.

MATERIAL:

Malleable Iron
Galvanized Steel Hardware

FINISH:

Hot Dip Galvanized

HOT DIP GALVANIZED

EDGE TYPE CONDUIT SUPPORT

APPLICATIONS:

Edge type conduit supports are used to mount EMT or rigid conduits Perpendicular to a beam, channel or angle supports.

FEATURES:

Hot Dip Galvanized for added durability and corrosion protection.
Provides a secure connection and tight clamping action capable of withstanding heavy loads.

MATERIAL:

Malleable Iron
Galvanized Steel Hardware

FINISH:

Hot Dip Galvanized

RIGID OFFSET NIPPLES

APPLICATIONS:

Indoor or outdoor use
Use as an offset connector between two enclosures.
Offsets the axis of the raceways by 3/4"

FEATURES:

NPSM Thread: Smooth inside surface to facilitate wire pulling free of damage

MATERIAL:

Malleable Iron

FINISH:

Hot Dipped Galvanized

HOT DIP GALVANIZED

RMC U-BOLT WITH HEX NUTS

APPLICATIONS:

Used to support EMT/Rigid conduit/IMC

FEATURES:

For EMT/Rigid/IMC. Heavy Duty, Hex nuts included

MATERIAL:

Steel

FINISH:

Mechanically Galvanized

Part No.	UPC	Description	Unit Ctn.	Ship Case	Weight Case	A	B	C	D
