

The Future Is Screwless

SNAPConnect® and EdgeConnect® screwless termination technology is now available in controlled hospital grade receptacles

EdgeConnect Technology

- Built to rigorous hospital grade performance standards
- Connection strengthens over time, no strand relaxation
- No need for a screwdriver. Insert wire into terminal and push plunger down to terminate
- Receptacle clearly labeled “controlled” to identify on half controlled receptacles
- Available in red, ivory, gray, tamper resistant, and half or fully controlled

SNAPConnect Receptacle

- Built to rigorous hospital grade performance standards
- Easy installation of modular pigtails
- Energized circuit and clear connector remain safe to touch
- Snap on any device any time without powering down
- Control each outlet separately with split circuit receptacle
- Available in red, ivory, gray, tamper resistant, and half or fully controlled

20A Hospital Grade Receptacles
